## EDUCATION

### Full stack software development at Moringa School

Feb 2025 - Aug 2025

Moringa School

- Built websites and apps using skills learned from Moringas project based learning, creating functional products that worked end to end.
- Worked in teams using agile methods like standups, code reviews delivering projects on time hence improving team work productivity.
- Learned xore concepts and version control through hands-on practical challenges that boosted my problem-solving confidence.
- Collaborated with peers using tools like github, improving teamwork and communication.

### Thika Technical Training Institute

Feb 2021 - Aug 2022

Certificate in Mechanical Engineering.

- Created mechanical drawings using proper measurement and drafting tools, supporting project planning and practical work.
  - Fabricated and welded metal components using arc welding techniques to constantly produce accurate and and clean pieces of work for my projects.
  - Serviced workshop machines with diagnostic checks and tactics to properly reduce breakdowns and accidents.
- 

## WORK EXPERIENCE

### QA Engineer, Kutima Software Solutions

Oct 2025 - Present

- Develop and maintain automated Python scripts to ensure comprehensive coverage of new features and regression areas, increasing test efficiency and reliability.
- Execute and validate test suites on respective platforms, identifying issues early before passing on to the next QA Eng to run the tests.
- Collaborate closely with colleagues, clearly communicating test results and issues, to ensure alignment and proper resolution of defects.

### Project Manager, Agribusiness

Apr 2023 - Jun 2024

- Managed day to day operations to optimize workflow boosting productivity and efficiency across the project.
- Interacted directly with clients gathering feedback and adjusting operations to better meet demand and expectations.

### Technical Personell, Sichey Automotive

Feb 2022 - May 2022

- Overhauled and inspected engines, replacing worn components and reassembling to restore full operational performance and reliabilty.
  - Performed diagnostic checks, routine maintenance using diagnostic machines and investigation to ensure optimal performance and reducing downtime for clients.
- 

## ADDITIONAL INFORMATION

- **Programming tools:** Javascript, Python, PostgreSQL, Reactjsx/native, Node.js, Flask.
  - **Languages:** English, Kiswahili, Taita.
  - **Certifications:** Moringa, Freecodecamp, Havard CS50.
  - **Interests:** Gaming, reading comics/novels, film, cars, tech, hiking.
-
